

THE
BURGESS
BEDDING COMPANY LIMITED

BURGESS AND THE ENVIRONMENT

We at Burgess strive to work with sustainable materials where possible. Our timber is responsibly sourced from accredited partners, our left over timber heats our factory and any waste materials are collected to be recycled and made into other wonderful things!

We use only reputable suppliers for our materials and make sure that every one meets all our high standards and more.

The suppliers we use operate sustainable programs and process fillings that can be traced back to their origins to ensure fair trade, legality and compliance with all UK and EU laws.

We take our responsibility to the planet very seriously and always strive to improve working with organisations such as GOTS / Soil Association and NBF.

All our products pass to UK and EU Fire laws.
